Resolution WG 03 / 4: SC 32/WG 03 Meeting Calendar

SC 32/WG 03 approves the following Meeting Calendar

From	To	Meeting/Purpose	Location
2000-07-03	2000-07-14	SC 32/WG 03 Meeting / Progress Working Drafts	Warwick, England
2000-07-03	2000-07-14	FCD Editing Meeting for SQL/MED	Warwick, England
2000-07-03	2000-07-14	FPDAM Editing Meeting for SQL/OLAP	Warwick, England
2000-07-03	2000-07-14	DCOR Editing Meeting	Warwick, England
2000-10-02	2000-10-13	SC 32 Plenary meeting	Helsinki, Finland

Note: The need for a physical Editing Meeting for the DCOR is not yet certain. Previous experience suggests that any ballot comments may be resolvable either completely without an editing meeting or through an e-mail editing meeting. However, should an editing meeting be necessary then the proposed meeting calendar allows for one.

Resolution WG 03 / 5: SC 32/WG 03 Project Subdivisions

SC 32/WG 03 approves the following subdivisions and minor enhancements to existing work:

Project Number	Title	Project Editor	Rationale Doc #
03.05.12.00.00	Information technology - Database languages - SQL — Replication (SQL/Replication).	Melton, Jim	SC32 N00435 (WG 03 SAF-045)

Rationale Summary:

To date, there are more commercial database applications developers (independent software vendors, or ISVs) who have created their own in-house replication software than all ISVs using all commercial replication products combined. All of the homegrown and many of the commercial products are incompatible, hindering total market growth for all vendors.

The major reason why ISVs continue to create their own custom replication software is that most ISVs support three to five different database vendor platforms, each of which provides different replication functionality or none at all, and are not able to bear the training and administrative expense of learning and supporting three to five different replication systems. ISVs continue to do this custom software development in spite of research that shows each such replication project effort costs well in excess of US\$1 million and that most of such efforts fail.

Database replication capability is a growing requirement in the marketplace and will remain so for the foreseeable future, has become well-understood with mature implementations available, but lacks a useful standard that would help the user community and promote adoption for all vendors.

Proposal part 2 (wording of SC 32 non-plenary ballot for SQL/Replication): WG 3 recommends that SC 32 initiate a non-plenary ballot to approve a split of project {01.32.03.05} that creates a new part of 9075 (9075-12) entitled SQL/Replication, whose title and terms of reference are documented in JTC 1/SC 32 N00435 (WG3:SAF-045) and for which a candidate base document will be provided (SC32 number not yet assigned) and announced before the ballot is initiated.

SC 32/WG 03 instructs its Convener to forward these subdivisions to SC 32 for endorsement.

Resolution WG 03 / 6: SC 32/WG 03 Project Withdrawals

SC 32/WG 03 approves the following withdrawals from existing work:

Project Number	Title	Rationale Doc #
03.03.00.00.00	Information technology --Database language - SQL	SC32 N00436
03.03.01.00.00	Information technology --Database language - SQL - Part:3 SQL/CLI	SC32 N00436
03.03.01.01.00	Information technology --Database language - SQL - Technical Corrigendum 3	SC32 N00436
03.03.02.00.00	Information technology --Database language - SQL - Part:4 SQL/PSM	SC32 N00436
03.04.01.02.00	Information technology --Database language - SQL - Technical Corrigendum 1 (for CLI)	SC32 N00436
03.04.01.03.00	Information technology --Database language - SQL - Technical Corrigendum 1 (for PSM)	SC32 N00436
03.04.07.00.00	Information technology --Database language - SQL - Part:7 SQL/Temporal	SC32 N00436

Rationale Summary:

Standards produced by these projects have been superseded by new standards produced by later projects or, in the case of 03.04.07.00.00, were not produced due to a realignment of resources to meet market priorities.

Upon receipt of texts, SC 32/WG 03 instructs its Convener to forward these withdrawals to SC 32 for endorsement.

Rationale Summary:

This proposed DCOR ballot is a result of Defect Report 9075/10. This defect report is available as ISO/IEC JTC 1/SC 32 N00437 (WG 03 N0032.)
