**Resolution from JTC 1/SC 32 Meeting Santa Fe, New Mexico 2000-01-28  
32N0456**

**Resolution 24: MOU Clause A.5 of the Rev.1 version of the ISO, IEC, UN/ECE and ITU MOU/IEC in the field of “electronic business”.**

SC32 has noted the requirement for the development of guidelines for the use of standards for naming, defining and coding of data elements, that are to be used as the basis for the development of UN/EDIFACT directories. IS 11179 parts 4 and 5 address the area of naming, and defining of data elements and are available for use by other standards developing organizations. SC32 will continue to monitor the progress of other related standards in this area and make available this information in specific liaison statements as required.

The SC 32 Secretariat is to pass this resolution on to ISO/IEC JTC 1 and to the MOU-MG.

*Voted and Accepted*

*Unanimous*
