The Editing Meeting completed its business on the 13th of July 2000 with the following resolution which was passed unanimously by all 8 National Bodies present (7 P members and 1 O member):

The Editing Meeting held in Warwick, England, between the 3rd and the 13th July 2000 recommend that the Technical Corrigendum document be transmitted to ITTF in Geneva for publication as a COR as soon as the revised text is available.

The National Bodies voting included both of the National Bodies that voted No on the ballot. 170 comments resulted from the ballot. The Editing Meetings managed to resolve all of these 170 Ballot Comments. The resolution was generally a technical solution but in very few cases new problems were reported in the published standard for which there was no time to develop satisfactory and reliable solutions and these have been passed on to the Working Group for solution. Also in a few cases the “problem” reported was not an actual problem but a request for additional functionality and these too have been passed to the Working Group.

A number of Ballot Comments required that any additional problems discovered during the editing process also be resolved. All such problems discovered were resolved by proposals addressing existing ballot comments.

At the close of the final meeting there were **no** outstanding known problems with the Technical Corrigendum under ballot.

We hope therefore that the SC32 secretariat will forward the Technical Corrigendum to ITTF in Geneva for publication as a COR immediately the final text is available.

The Editor, Stephen Cannan, plans to ship camera ready copy on Sunday, September 17th, 2000 to the SC32 Secretariat for onward transmission to ITTF.

The SQL DCOR editing meeting further recommended, following past precedent, that the following documents should comprise its Disposition of Comments Report:

- 1) 32N00503, Convenor’s recommendation on progression to the SC32 secretariat (this document)
- 2) 32N00498, ISO 9075 DCOR Final Disposition of Comments
- 3) 32N00499, Minutes of ISO 9075 DCOR Editing Meeting, Warwick, England
- 4) <to be assigned>, ISO 9075 COR Text

Please note that items 4) will not be available until 2000-09-17.
