SC 32 N0579

TITLE: TC215 Liaison Report

The June 2000 meeting of ISO TC215's Vocabulary and Terminology WG3 (?) sought advice concerning the status of ISO 7826 General structures for the interchange of code values, Part 1: Identification of coding schemes and Part 2: Registration of coding schemes. The SC32 WG2 representative present at that meeting confirmed the withdrawal of ISO 7826, and advised that its functions were covered within ISO 11179 (especially part 6). The WG3(?) meeting was provided with information about the current 11179-3 revision, its intended progression, and the possibility that the other parts of 11179 might be progressed in parallel with this revision. The relevance of the proposed expansion of 11179's scope, and the relevance of all six parts of 11179 to TC215 WG3's work was noted. The SC32 WG2 representative agreed to provide any further information that TC215 WG3 members may request.
