Rationale for withdrawal of IRDS Content Module Guidelines project

This project was delayed for a variety of reasons, including particularly the organisational disruption caused by the JTC1 re-engineering process, and the consequent changes in personnel and priorities.

The project has not reached DIS, but the work has been published to a sufficient state for it to influence other work in the metadata area within SC32 WG2.

In the absence of resources to complete the work, it should be closed down tidily.
