## Title: Project splits for ISO/IEC 11179 & 20943

### ISO/IEC 11179-3 (3<sup>rd</sup> Edition)

The resolution of the FCD 11179-3 ballot has resulted in the progression of the document to FDIS. In order to achieve consensus for the second edition of this standard, a number of more contentious issues have been deferred to the next edition. WG2 now wishes to begin work on that next edition, and proposes a project split for this purposes.

Project number	Part number	Part title	Editor
1.32.15.03.03.00	11179-3	Metadata registries (MDR) – Part 3: Registry metamodel and basic attributes (3 <sup>rd</sup> edition)	Ray Gates (Canada)

### TR 20943-0 – new part for Technical Report

TR 20943 is a multi-part Technical Report on Achieving metadata registry content consistency. The existing parts focus on specific aspects of metadata, namely:

- Part 1 – Data elements
- Part 2 – XML data (to be started)
- Part 3 – Value domains

WG2 has identified a need for a more generic TR, providing a broad overview of the use of a 11179 metadata registry, including frequently asked questions and answers. A new Part 0 is proposed as this Overview.

Project number	Part number	Part title	Editor
1.32.16.01.00.00	20943-0	Achieving metadata registry content consistency – Part 0: Overview	Ray Gates (Canada)

These projects have been added to the WG2 programme of work in WG2-SEL-022, and passed by WG2 resolution in WG2-SEL-032.
