Number of Pages	3
LANGUAGE USED	English
DISTRIBUTION	P & L Members SC Chair WG Conveners and Secretaries

The activities of WG3 and Editing Meetings on WG3 progression documents since the last SC 32 Plenary are described below.

Project 1.32.03.06

SQL Parts at FDIS

At the FCD 2007 New York ballot resolution meeting, WG3 resolved all comments on:

- ISO/IEC 9075-1 SQL/Framework
- ISO/IEC 9075-2 SQL/Foundation
- ISO/IEC 9075-3 SQL/CLI
- ISO/IEC 9075-4 SQL/Persistent Stored Modules
- ISO/IEC 9075-9 SQL/MED
- ISO/IEC 9075-10 SQL/OLB
- ISO/IEC 9075-11 SQL/Schemata
- ISO/IEC 9075-13 SQL/JRT

The final FDIS documents were delivered to ITTF in November, 2007. ITTF initiated an FDIS ballot on 14th April 2008.

Project 1.32.03.07

SQL Parts at IS

Because of SQL/XML:2006, the SQL/XML is one project generation ahead of the other 8 parts of 9075. At the November 2007 interim WG3 meeting in Germany, we resolved all ballot comments on an FCD ballot for ISO/IEC 9075-14 SQL/XML (in lock step with the FCD ballots for the 8 parts in project 1.32.03.07). The FDIS document was delivered to ITTF in March, 2008. ITTF initiated an FDIS ballot on 14th April 2008.

SQL Parts at WD

Working Drafts for the following parts were submitted to the SC 32 Secretariate on 19th December 2008:

- ISO/IEC 9075-1 SQL/Framework
- ISO/IEC 9075-2 SQL/Foundation
- ISO/IEC 9075-4 SQL/Persistent Stored Modules
- ISO/IEC 9075-11 SQL/Schemata

Project 1.32.03.08

SQL Parts at WD

Working Draft for the following part was submitted to the SC 32 Secretariate on 19th December 2008:

- ISO/IEC 9075-14 SQL/XML

Project 1.32.09.01.01 – Technical Reports

During the April 2005 discussions on the WG3 future work program the idea was raised of producing a series of Technical Reports on various aspects related to the SQL standards and their use in specific situations. In order to be able to act on this suggestion, we requested a NWI, which was approved in July, 2005, for a series of Technical Reports. While we have made progress in other areas, we have not yet produced an initial draft in this area.

Summary

Excellent progress continues to be made on all fronts. Attendance at meetings is good — at least 6 National Bodies are regularly contributors. The implementers, including some open-source ones, continue to be interested in the standard and its development.
