

**Report by the Ad-Hoc on JTC1 IT Vocabulary Maintenance Team (JTC1 VMT)
to the JTC1/SC32 2009 Jeju Plenary**

1. Comments on JTC1 Review Process

When submitting for review and consent by JTC1 SCs, the JTC1 Vocabulary Maintenance Team (VMT) needs to provide a rationale for any proposed changes to ISO/IEC 2382. Presently, a rationale is not required by the JTC1-defined process.

[Proposed SC32 Resolution]

Rational Required for JTC1 VMT Proposed Changes

SC32 requests that the JTC1 VMT provide to the SC, as part of its SC review/consent process, a rationale for proposed changes to ISO/IEC 2382 Information Technology Vocabulary.

2. Review process of JTC1 VMT (vocabulary maintenance team) changes within SC32

SC32 needs to define responsive/quick turnaround on review/comments.

[Proposed SC32 Resolution]

Establishing an Ad Hoc Committee for Reviewing JTC1 VMT Change Requests

Considering the timing of JTC1's VMT (vocabulary maintenance team) review requests is unknown, and considering that SC32 desires to provide prompt and thorough feedback to JTC1, SC32 establishes an Ad Hoc Committee on JTC1 VMT Review with the following terms of reference:

- The ad hoc committee will receive JTC1 VMT review requests, with associated rationales, and disseminate them within SC32 officers (SC32 Chair, SC32 Secretariat, WG Conveners), SC32 National Bodies, and SC32 WG's experts for review and comment.
- The ad hoc committee consolidate and review comments to return to JTC1.
- The ad hoc committee will make use of electronic collaboration to speed review (e.g., teleconferencing and E-mail).

The SC32 Secretariat will issue a call for participants. National Bodies will nominate delegates to the ad hoc committee.

The ad hoc committee will be co-chaired by Mr. Jake Knoppers (Canada) and Mr. Frank Farance (US).

3. Comments on JTC1 Publishing a Consolidated 2382 Vocabulary

[Proposed Resolution]

SC32 Comments On Orderings in Consolidated ISO/IEC 2382 Work

SC32 notes (to JTC1) that present thematic orderings (e.g., most parts of the current 2382 part and subclause structure) is deemed useful and requests that, in addition to alphabetic ordering, one will continue to be able to search and retrieve via thematic ordering as found in the present structure of the Parts of ISO/IEC 2382

4. SC32 request to JTC1 on 2382-17
[Proposed Resolution]

SC32 requests that JTC1 transfer 2382-17 to the SC32 Programme of Work and make 2382-17 freely available, as it has previously done for 2382 parts 4, 5, and 6.

5. Appreciation

Thank you to Mr. Yong-Tae Kim (Korea) for providing lunch to the committee.

Thank you to ad hoc committee co-chairs Mr. Jake Knoppers and Mr. Frank Farance.
